# SOFTWARE DESCRIPTION

Trade-BnB is a broker-dealer app that allows users to trade stocks, options, and ETFs with zero commission fees. You can also buy and sell crypto-currencies on Trade-BnB App. Trade-BnB allows users to trade cryptos like [Bitcoin](#), Ethereum and Litecoin.

## Description

Because Trade-BnB doesn't charge any trading commissions, it's much easier for novice traders to learn how to make money. The second advantage you have is that there is no minimum deposit requirement to get started trading with Trade-BnB App. You can start investing with any amount of money.

The downside is, Trade-BnB don't offer any tax-sheltered accounts like the IRAs or other types of retirement accounts. Another drawback of Trade-BnB is that right now they don't offer automated trading features.

You can trade the following instruments on the Trade-BnB App:

- Stocks
- ETFs
- REITs
- Options
- Cryptocurrencies

Trade-BnB offers \$0 commission trading account. Normally, when you start trading stocks, a stockbroker will charge you between \$5 and \$15 to buy stocks. When you want to take profits and sell, the stockbroker will charge you another fee. This isn't the case with Trade-BnB.

## Platform Requirements

Supported on WIN-9 and above, MAC OS Sierra and above.

Browsers support: Google Chrome, Safari, Firefox, IE (**NOT SUPPORTED**)
